

# transformation design

the dynamics of innovation

## Hypercycle of Transformation

Innovation cycles add up to a *Hypercycle of Transformation*. Interdependent developments in interaction, symbols, organization, products, and meta-materials lead to evolutionary transformations. These cannot completely be anticipated, planned or controlled.

Hypercycle of Transformation. Idea & concept: Peter Friedrich Stephan. Contact: [info@peterstephan.org](mailto:info@peterstephan.org).  
The concept of a hypercycle is based on ideas developed by Manfred Eigen and Ruthild Winkler (1975).
